

SUSTAINABILITY

according to scope 1 + scope 2, MAXX must balance 102T Co2, which are balanced with the certificate below.

MAXX THEREFORE IS PRODUCING **CO2** NEUTRAL.

Climate+
Positive Action for Planet + People

We are delighted to confirm the retirement of
102 Verified Emission Reductions (VERs)
for
Fokus Zukunft GmbH & Co. KG
on 02/03/2022

Projecto Mirador Enhanced Distribution of Improved Cookstoves in Latin America - First VPA for
Distribution of Dos por Tres Cookstoves in Honduras
MAXX Mess-und Probenahmetechnik GmbH

*These credits have been retired, saving 102 tonnes of CO2 emissions
from being released into the atmosphere.
Thank you for investing in a safer climate and more sustainable world.*

Gold Standard

Retirement certificates are hosted on the Gold Standard Impact Registry, [view your certificate](#).

ENERGY:

MAXX Photovoltaic System 88 kWp (50 kWp + 38 kWp)

MAXX is producing with the Photovoltaic system approx. 77000 kW per year (average 5 year-period).

In the same 5year-period we are saving approx. 270.000 kg Co2. (54.000 kg p/y)

Our total energy consumption per year is approx. 55.000 kW. Therefore, we are better than Co2 neutral, regarding energy consumption.

Manufacturing process:

we do have "clean" manufacturing processes without the need or use of oil, chemicals etc. That's why we produce practically no waste and certainly no problematic ones.

Waste and Recycling:

of course, we do have a separation system for any waste in the company. We do have extra containers for paper, plastic, steel, wood, electronics, batteries etc..

For the disposal, we are working with a *certified* company for Recycling. This enables us to ensure that all our waste is disposed of properly.

We are following the **ISO14001**, even if we are not certified.

Rangendingen, March 2022
